BCN Fact Sheet

Features

- Enables non-technical citizen integrators to Deploy, Configure, Schedule and Run prepackaged integration packs
- Reduces workload on limited IT resources
- Enhances security – IT staff doesn't require access to confidential authentication information; business staff doesn't require access to sensitive components and capabilities of the Boomi Atomsphere platform
- Business users can elect to receive automated alerts of process exceptions without having direct access to the Atomsphere
- Fine grained control over user access to Connect Now features
- Supports custom parameters for process execution requests
- Customizable help bot - in addition to general Connect Now help topics, supports topics and answers that are only available to a specific account or to subs of a master account
- SSO supported
- Can be embedded directly in a web app (example)
- Built on the Boomi Flow platform

Requirements

- Current Dell Boomi agreement with Master/Child account configured
- Base Boomi Flow license
- Publication of one or more Integration Packs

Implementation

- Professional Services and Support for Connect Now delivered by Enspire Technologies
  - Enspire Technologies developed the architecture and application and performs ongoing development and PSO for Connect Now
- Implementation is a one-time fee which includes
  - Initial setup
  - Minor customization and branding, with substantial customization available under a separate SOW
  - Train-the-trainer session
  - Close partnership and consultation during initial ramp-up
- Annual support agreement is available
